

Call Waiting Script

“Seasonal Flu is Important Too!”

:15

“Hello and thank you for calling **[Physician Office Name]**. Although the H1N1 virus has been the focus of health care discussion since spring, it’s important that we also remember the risks associated with the seasonal flu. Timely immunizations for the flu, pneumococcal pneumonia, and hepatitis B can help protect you and your family against preventable infections. Ask your doctor **TODAY** for information about the benefits of receiving vaccinations! It’s worth a shot. Don’t miss it.”
