

**Women
over 60
should
still do it.**

***What should
they do?***

***Just
Ask!***

Did you know that the risk for breast cancer increases with age?

A mammogram can help your doctor find the cancer early!

To find out where you can get a mammogram, just ask:

- Your doctor or nurse
- Your local health department or clinic
- The National Cancer Institute's Cancer Information Service at 1-800-4-CANCER

Worried about costs?

- Medicare pays 80% for screening mammograms every 12 months
- The Missouri Breast and Cervical Cancer Control Project (BCCCP) may help with costs. Call 1-800-4-CANCER to see if you qualify
- Private insurance may cover your cost
